

“maximizing opportunities for international, Asian and PRC-based clients whilst working to maximize growth and manage risk.”

Services Brochure - FCP Advisory

FCP Advisory Services is built on the principles of maximizing opportunities for international, Asian and PRC-based clients whilst working to maximize growth and manage risk.

FCP works to build long-term relationships with its clients through developing a detailed understanding of their business and strategic objectives. Clients value our strong internal processes and highly professional, multicultural and skilled multilingual approach to relationships and strategies. Such fundamentals allow FCP to efficiently and effectively undertake cross-border transactions, achieving the fine balance of thinking globally and acting locally.

In any transaction involving the purchase, restructuring, sale or merging of a business, there are numerous issues that can impact the final outcome. FCP understands that these issues impact business value, as well as employee and community relations. We therefore assist our clients on issues such as valuation, effective transaction structures and negotiating terms. By understanding our clients' objectives and through leveraging our business networks across China, Asia, USA and the UK, FCP, along with our International co-investors is able to plan and implement each phase of a successful transaction under an effective, consolidated managed response.

As part of the FCP Group, FCP Advisory works closely with FCP Corporate, allowing the provision of an effective cross-border and China market entry advisory, combined with structuring, corporate and trust services for our clients, resulting in an end-to-end managed response.

ADVISORY SERVICES

- Strategic & business planning
- M&A, MBO, LBO structuring and financing
- Property transaction structuring
- Pre-IPO structuring and investment
- Direct investment via FCP Investments and our co-investor network
